TASK 3129

5025/0012

I had a call from Mark Carter with MMG Mining asking about the bond escalation for Bald Knoll. He told me he and his wife were the victims of identity theft and that it has taken them a little longer than he anticipated to get a replacement surety.. He thinks it should be done by about the end of the month, and I told him we would extend the deadline until April 15. After that we should call and ask about it.

I will ask Penny to change the date on the PPR task in MTS. Could you please print this message for the file? Thank you.
